

Inkom-DV company profile is lumber production. Producing eaves board made of finewood is our top priority. Our production is made of oak, ash-tree, cedar, larch, hazel, linden. We also use Yakut larch, which has better strength and hardness index, compared to other tree species.

Our production area is in Khabarovsk, Russia's Far East. We apply modern equipment for wood manufacturing and drying. All our production goes through quality inspection, thus ensuring only excellent quality goods for our clients.

Below you will find the standard dimensions of eaves board:

Hardwood

Thickness mm	Length mm	Width mm
25-50	1000-4000	90-150

Softwood

Thickness mm	Length mm	Width mm
25-50	1000-6000	125-150

We also produce eaves board according to individual measurements.
